Subject: Comments for AB 32 Scoping Plan Workshop of September 26, 2008
Comment:

```
...
The Draft Scoping Plan identifies vehicle feebates as a
recommended Emission Reduction Measure to supplant the Pavley
regulations in the event that the latter cannot be implemented.
The fee schedule would "be designed to obtain cumulative emission
reductions equivalent to those that would have been achieved under
the Pavley regulations".  The plan also contemplates a broader role
for feebates to complement Pavley and create "an incentive for
manufacturers to improve vehicles beyond what would be required by
Pavley".  However, staff has made no attempt to quantify the
additional emission reductions that could be achieved with
feebates.

Subject: benefits of highway speed reductions need analysis
Comment:

```
CARB should analyze the potential carbon emissions reductions
associated with highway maximum speed reductions.  Please see the
attached document for supporting evidence.
```
