THE COALITION TO STOP CLEARCUTTING CALIFORNIA

Industrial-scale clearcutting is:

- Converting California's diverse forests to fire-prone tree plantations
- Threatening water quality and quantity
- Promoting extensive use of chemical herbicides
- Contributing to global climate change
- Endangering wildlife and their habitat
- Damaging private property values and businesses in affected regions

We, citizens of California and supporters of sustainable logging, call upon the:

- Governor of California
- Legislature of California
- California Department of Forestry and Fire Protection
- Environmental and Natural Resources agencies of the state of California

To use all means at their disposal to end this destructive practice.
