#91-18

Dear Mr. Parrish

Certification of Emco Wheaton Euroboot Nozzle Bellows

The Emco Wheaton Euroboot Bellows now meets the requirements for California Air Resources Board (CARB) certification. Our testing of the bellows indicated that the vapor recovery efficiency and durability are satisfactory.

As required by the CARB certification and test procedures, you requested the approval of the Division of Occupational Health and Safety (DOSH), the Office of the State Fire Marshal (SFM) and the Department of Food and Agriculture, Division of Measurement Standards (DMS). The necessary approvals have been obtained from these agencies.

I find that the use of the Euroboot on the Emco Wheaton A4001 and A4005 nozzles will not adversely affect the performance of gasoline vapor recovery systems. Therefore, the Euroboot bellows is approved for use with Phase II gasoline vapor recovery systems in California. The Euroboot may be used only with the A4001 and A4005 nozzles.

If you have any questions, please call Laura McKinney, Associate Air Pollution Specialist, at (916) 327-1525 or Darrell Hawkins, Associate Air Resources Engineer, at (916) 324-7343.

Sincerely,

James J. Morgester, Chief
Compliance Division
