Developing Electric Vehicles in China

"China will have produced 5.9 million cars and light-duty commercial vehicles by the end of the year and bumped out Germany as the world's third largest auto producer, according to a recent study by Polk Marketing Systems in Essen."

Our Vision

Our vision is to replace gasoline-powered cars with electric vehicles wherever appropriate to reduce air contaminants and to promote public and environmental health.

"I say the debate is over. We know the science, we see the threat. And we know the time for action is now."

--Governor Schwarzenegger
