Fenton, MO 63026

#92-13

Dear Mr. Poli:

Approval of SEV4U Replacement Spout

The M Carder model SEV4U replacement spout, for use on Emco Wheaton A4000, A4001, A4002, and A4003 nozzles, has met the requirements for California Air Resources Board (CARB) certification. Our evaluation of this equipment indicated that the operation and durability will be satisfactory.

As required by CARB certification and test procedures, you requested the approval of the Division of Occupational Health and Safety, the Office of the State Fire Marshal, and the Department of Food and Agriculture, Division of Measurement Standards. The necessary approvals have been obtained from these agencies.

I find that use of the SEV4U replacement spout will not adversely affect the performance of A4000, A4001, A4002, and A4003 nozzles in gasoline vapor recovery systems. Therefore, the model SEV4U spout is approved for use with Phase II gasoline vapor recovery systems in California.

If you have any questions, please call Darrell Hawkins at (916) 324-7343 or Laura McKinney at (916) 327-1525.

Sincerely,

James J. Morgester, Chief
Compliance Division
