Hello,

I was instructed that the system for entering public comment for the current CARB meeting is experiencing technical difficulties. Therefore, I am sending you my comment for inclusion in the record.

Thank you,
Jesse

"I am writing to CARB today to request that members of the Board take action and move forward with the Clean Idling Ship Rule and At-Berth Regulation. This action is critical since ocean-going vessels are among the world's biggest polluters, and while they idle at port, they burn dirty diesel fuels that expose nearby communities, often BIPOC and low-income, to dangerous levels of toxic diesel pollution. With the risks of COVID-19 still strongly present, the time to clean up the air quality in our ports is now. Again, I implore CARB to pass the Clean Idling Ship Rule and At-Berth Regulation to help ensure clean air for all communities today and into the future."
