C012-66

Ms. Kathleen Labriola
1714 9th St
Berkeley, CA 94710

12/7/08

Dear CARB Chair Nichols,

I am writing to urge you to put the health + safety of Californians + of the environment before the demands of the trucking industry. Please vote for the proposed rule to clean up toxic emissions from trucks, busses, + other diesel-powered vehicles. Please support the On-Road Diesel Rule, which requires vehicle owners to meet certain engine criteria + emissions standards by retrofitting with an affordable control device, repowering by replacing old engines with cleaner ones, or replacing old vehicles with cleaner vehicles.

This rule is necessary to protect the public from respiratory illnesses + to meet upcoming federal air
