STATE OF CALIFORNIA

AIR RESOURCES BOARD

Executive Order G-70-14-A

Relating to the Modification of the Certification of the
Red Jacket Aspirator Assist Service Station
Phase II Vapor Recovery System

Pursuant to the authority vested in the Air Resources Board (ARB) by Health and Safety Code Section 41954; and

Pursuant to the authority vested in the undersigned by Health and Safety Code Sections 39515 and 39516;

IT IS ORDERED AND RESOLVED: That the certification issued on November 29, 1977, for the Red Jacket aspirator assist, Phase II vapor collection and disposal system licensed to and marketed by Wylain, Incorporated, Red Jacket Pumps Division, is hereby modified to limit the choice of nozzles for the dispensing of unleaded gasoline to nozzles which are capable of fueling all vehicles as required in the Air Resources Board certification procedures adopted March 30, 1976 and amended August 25, 1977 and to revise the component list to reflect changes made by the State Fire Marshal to his identification numbers. The system hereby modified is certified for attendant and/or self-serve use at gasoline service stations in conjunction with Phase I vapor recovery systems which have been certified by the Air Resources Board. The system is described in Exhibits 1 and 2 attached hereto.

IT IS FURTHER ORDERED AND RESOLVED: That compliance with the applicable certification requirements and rules and regulations of the Division of Measurement Standards, the State Fire Marshal's Office, and the Division of Industrial Safety of the Department of Industrial Relations is made a condition of this certification.

IT IS FURTHER ORDERED AND RESOLVED: That the system certified hereby shall perform in actual use with the same effectiveness as the certification test system. Compliance with this performance criterion shall be a condition of this certification, and failure to meet this criterion shall constitute grounds for revocation, suspension, or modification of this certification.

IT IS FURTHER ORDERED AND RESOLVED: That any alteration to the equipment parts, design, or operation of the system certified hereby, is prohibited, and deemed inconsistent with this certification, unless such alteration has been approved by the undersigned.

Executed at San Francisco, California, this 22nd day of February, 1978.

William H. Lewis, Jr.
