

Proposition 1B: Goods Movement Emission Reduction Program
JUNE 2014 SEMI-ANNUAL STATUS REPORT

This status report provides an update on implementation of the \$1 billion Proposition 1B: Goods Movement Emission Reduction Program (Program) to reduce emissions and health risk from freight operations in California's priority trade corridors through incentives. Consistent with State law, the Program Guidelines for Implementation (Guidelines) and related documents detail the grant/contract requirements for the Air Resources Board (ARB or Board), participating local agencies, and equipment owners (see Program website at: <http://www.arb.ca.gov/gmbond>).

ARB adopts the Guidelines, and then solicits, awards, funds, and oversees grants to local agencies like air districts and seaports. The local agencies offer grants or contracts in a competitive process to diesel equipment owners to co-fund the upgrade of diesel equipment to cleaner technologies, ahead of or beyond any regulatory requirements to do so. To ensure accountability and effective use of these public funds, the local agencies: solicit for eligible projects, review applications, inspect the old equipment, provide data to competitively rank each piece of equipment based on emission reductions and cost-effectiveness, sign contracts with equipment owners, inspect the upgraded equipment, make payment for the cleaner technology, and track/report on funded projects.

The information in this report is based on the local agencies' semi-annual reports as of March 31, 2014 and supplemented with information in the Program's Goods Movement Online Database. The information is reported by year of funding, as defined below.

- Year 1: Awarded May 2008 Board Hearing
- Year 2: Awarded June 2010 and December 2011 Board Hearings
- Year 3: Awarded December 2011 Board Hearing - drayage truck projects only
- Year 4: Awarded July 2013 Board Hearing

Available Funding and Expenditures

Each budget appropriation authorizes ARB to use a specific amount of funding for this Program, within statutory timeframes. However, the appropriation does not provide any cash for this purpose. Therefore, we depend on the receipt of proceeds from State bond sales or other mechanisms to fund new projects.

The entire \$1 billion has been appropriated in State budgets (over multiple years), with \$980 million to ARB for this Program and \$20 million set aside by the control agencies to cover bond issuance and oversight costs. However, because cash equal to the appropriations was not available, approximately \$240 million reverted; the Fiscal Year (FY) 2014-15 budget includes an appropriation for this amount. ARB will need to request cash through the established Department of Finance process.

ARB has allocated approximately \$740 million for local agency projects and ARB's administration costs over multiple years, and has paid about \$693 million through

Proposition 1B: Goods Movement Emission Reduction Program
JUNE 2014 SEMI-ANNUAL STATUS REPORT

June 2014. ARB will request cash from commercial paper for the majority of the remaining funds over the next two months as local agencies continue to execute contracts and make payments to equipment owners.

Project Results and Benefits

The Program bond monies are leveraging substantial match funding from private, local, and federal sources – more than one match dollar for every Program dollar invested.

Trucks. The local agencies have completed the truck projects from Year 1 through Year 3 with more than 9,500 cleaner trucks operating in the four trade corridors. The local agencies are in the process of implementing the Year 4 projects and expect about 4,000 trucks to be upgraded with cleaner equipment.

Ships at Berth. The Bay Area District's early grant project to install grid-based electrical power for three berths at the Port of Oakland was completed in 2011. Under Year 2 grant projects, the installation of electrical power was completed in 2013 for nine berths at the Port of Oakland and 25 berths at the Ports of Long Beach, Los Angeles, and Hueneme. Ships began to plug into the grid in early 2014.

Locomotives and Commercial Harbor Craft. The Sacramento and South Coast Districts completed the upgrade of 19 locomotives operating in the Central Valley and the Los Angeles/Inland Empire trade corridors. Another six locomotives operating in the latter trade corridor are expected to be upgraded by the end of 2014. In addition, the San Diego District's harbor craft project was completed and operational in 2013.

Benefits. When fully implemented, we expect projects included in this report will reduce over 4 million pounds or 2,000 tons of particulate matter (PM 2.5), plus over 170 million pounds or 85,000 tons of nitrogen oxides (NOx). Emission reductions for projects funded through 2013 are over the life of their grant term (e.g., 2 to 5 years for trucks and 10 years for ships at berth). Emission reductions for the Year 4 grants take into consideration ARB's regulations and include only the portion of the emission reductions that are early or extra to the regulations.

Implementation of Funds

Year 4. On July 25, 2013, the Board awarded approximately \$150 million, of which \$143 million was allocated for truck projects throughout the State, including \$5.3 million for loan assistance. In addition, \$6 million was allocated towards a truck filter substrate replacement program and nearly \$1 million for harbor craft projects. ARB is in the process of reallocating the \$5.3 million awarded for loan assistance to local agency projects, and is in the early stage of implementing the truck filter substrate replacement program. Additionally, Year 4 funds include monies not utilized from the Year 2 grants due to project fallout. Local agencies requested that these funds be made available to fund projects from the 2013 Truck Solicitations and ARB approved these requests consistent with the priorities and procedures in the Guidelines.

Proposition 1B: Goods Movement Emission Reduction Program
JUNE 2014 SEMI-ANNUAL STATUS REPORT

Local agencies held solicitations for truck projects beginning August 2013 through early October 2013 and a subsequent backup truck solicitation prioritizing small fleets between early October 2013 and early December 2013 (2013 Truck Solicitations). The local agencies received applications for over 5,000 projects in excess of \$200 million with half of the applications submitted by small fleets. They are in the process of completing the application evaluations and have begun signing contracts with equipment owners. The cleaner equipment will be operational beginning summer 2014.

Year 2 and Year 3. ARB received funds for these projects in 2010 and 2011 from multiple bond sales. In June 2010, the Board awarded \$200 million in available cash primarily for truck projects and ships at berth/cargo handling equipment projects, with smaller grants for locomotive and harbor craft projects.

In December 2011, the Board awarded approximately \$101 million from the Fall 2011 bond sale and also allocated potential proceeds from a Spring 2012 bond sale; all of these funds were allocated for truck projects including a set aside of \$66.6 million for drayage trucks (Year 3 projects). Funds not utilized for drayage truck were reallocated for Year 2 truck projects in accordance with the December 2011 Board approval. ARB received approximately \$15 million from the Spring bond sale and also reallocated \$6 million in ARB administration funds to complete the Year 2 truck projects.

All projects are complete except for the locomotive projects which typically take up to four years; they are expected to be operational by the end of 2014.

Year 1. The first year funds of approximately \$246 million were used for projects to upgrade trucks, locomotives, and ships at berth. All of these projects were suspended for 6 to 14 months due to the December 2008 “stop work” order on bond funded programs, which resulted in an extended delay from time of application to contract. This led to some funds being unused by the local agencies; grant agreements were amended to transfer funds from undersubscribed grants to oversubscribed grants. All projects are complete.

Project Status

The tables on the following pages present the information by trade corridor (Table 1), source category (Table 2), and by grant agreement (Tables 3 through 8).

Proposition 1B: Goods Movement Emission Reduction Program
JUNE 2014 SEMI-ANNUAL STATUS REPORT

TABLE 1 PROJECTS BY TRADE CORRIDOR

Trade Corridor (Local Agency)		Dollar Amount	PM 2.5 (lbs)	NOx (lbs)	Operational Projects	Projects in Process
Los Angeles/Inland Empire	(South Coast Air Quality Management District)	\$385,631,095	2,169,000	98,859,000	2,883 other trucks 1,601 drayage trucks 25 ships at berth 4 locomotives	2,212 other trucks 6 locomotives
	(Port of Long Beach)	\$3,550,000	57,000	609,000	67 drayage trucks	NA
