Verified Diesel Emission Control Strategy Manufacturers, Dealers, and Installers

The following diesel emissions control system manufacturers and dealers have either verified diesel emissions control strategies (VDECS) or are in the process of verification. It is not legal in California to sell diesel emissions control systems that are not verified by the California Air Resources Board under title 13, California Code of Regulations, sections 2700-2710.

HUSS, LLC

Engine Rebuilders

Engine rebuilders must follow the engine rebuilding practices of title 40, Code of Federal Regulations, Part 89.130 (40CFR89.130), 40CFR1068.120, and title 13, California Code of Regulations, section 2423, subsection I (13CCR 2423(I)). TRU Advisory 08-05 provides more details at:

Engine Replacements

Replacement engines must meet 40 CFR 1068.240 and 13 CCR 2423(j). Replacement engines must be the cleanest engine available that will fit and perform in the equipment. Replacing an old engine with a new or newer engine resets the in-use performance standard compliance deadline to 7 years after the replacement engine's model year or effective model year. The model year is used if the replacement engine meets an emissions standard that is currently in effect. The effective model year is used if the replacement engine meets an emissions standard that is no longer in effect. Then, the effective model year is the last year that the prior-tier emissions standard was in effect.
