Subject: Regulation Amendments
Comment:

I am a California supporter of the Environmental Working Group (EWG) who wants cleaner air. I urge the California Air Resources Board to adopt the 2010 Consumer Products Regulation Amendments. These amendments would reduce smog-forming volatile organic compounds (VOCs) found in cleaning supplies and many other consumer goods.

They would also create product-specific bans of key ingredients with significant health or environmental concerns, including alkylphenol ethoxylates, perchloroethylene and chemicals with high potential to worsen global warming.

I encourage you to strongly regulate and reduce the harmful chemicals in consumer products. In doing so, we can set an important precedent in protecting the health of families and workers -- not only in our state but nationwide as well.

I appreciate the protections you have already put into place -- thank you for taking air pollution and our health seriously!

I am a California supporter of the Environmental Working Group (EWG) who wants cleaner air for myself and my family. I urge the California ARB to adopt the 2010 Consumer Products Regulation Amendments. These amendments would reduce smog-forming volatile organic compounds (VOCs) found in cleaning supplies and many other consumer goods.

They would also create product-specific bans of key ingredients with significant health or environmental concerns, including alkylphenol ethoxylates, perchloroethylene and chemicals with high potential to worsen global warming.

I implore you to strongly regulate and reduce the harmful chemicals in consumer products. In doing so, we can set an important precedent in protecting the health of families and workers -- not only in our state but nationwide as well.

I appreciate the myriad protections you have already put into place -- thank you for taking air pollution and our health seriously!

I am a Californian who wants cleaner air in my home, schools, and community and who supports the efforts of the Environmental Working Group organization. I urge the California Air Resources Board to adopt the 2010 Consumer Products Regulation Amendments! These amendments would reduce smog-forming volatile organic compounds (VOCs) found in cleaning supplies and other consumer goods.

It is important to me that these regulations create product-specific bans of key ingredients with significant health or environmental concerns, including alkylphenol ethoxylates, perchloroethylene and chemicals with high potential to worsen global warming.

I encourage you to strongly regulate and reduce the harmful chemicals in consumer products! In doing so, we can set an important precedent in protecting the health of families and workers -- not only in our state but nationwide as well.

Subject: Adopt 2010 Consumer Products Regulation Amendments
Comment:

My 11 year old son has very serious asthma and other health issues. His asthma worsens from chemicals in many synthetic cleaning products. Many days he can barely breathe. Many of his young friends also have serious asthma problems. It was not like this when I was a child. Cancer rates in children are also on the rise. And we all know the seriousness to our kids' future if we don't take immediate action to slow down global warming. Please please, take action on these issues.

I strongly urge the California Air Resources Board to adopt the 2010 Consumer Products Regulation Amendments. These amendments would reduce smog-forming volatile organic compounds (VOCs) found in cleaning supplies and many other consumer goods.

They would also create product-specific bans of key ingredients with significant health or environmental concerns, including alkylphenol ethoxylates, perchloroethylene and chemicals with high potential to worsen global warming.

They would also create product-specific bans of key ingredients with significant health or environmental concerns, including alkylphenol ethoxylates, perchloroethylene and chemicals with high potential to worsen global warming.

I sincerely hope that you will include chemical fragrance in this amendment. I have been chemically injured by the overuse of chemical fragrance in my former workplace and now am pretty much sequestered to the inside of my house. The VOC's emitted by these chemicals wherever you go is astounding. The neighborhood air is fraught with these chemicals venting from dryer vents making it impossible for me even go outside into my own yard.

I encourage you to strongly regulate and reduce the harmful chemicals in consumer products. In doing so, we can set an important precedent in protecting the health of families and workers -- not only in our state but nationwide as well.

I appreciate the protections you have already put into place -- thank you for taking air pollution and our health seriously!

Subject: California air quality

Comment:

I have lived in California since 1980 and remember Stage 1 smog alerts. I feel like my family is a "mini-lab" showing the effect of air quality as we lived in Diamond Bar. We moved from the east coast when I was 9, my sister 4.5 and my brother 1. My brother has asthma, my sister has allergies and I don't have any lung issues. I now live in Huntington Beach (a mile from the ocean) and can literally taste the nastiness on smoggy days. I do believe our air is better than the 80s and I do love the beautiful sunsets the smog creates but anything and everything you can do to improve the quality is SO IMPORTANT. Please continue to fight for our right to breathe.

Thanks

Isabella

I am a California supporter of the Environmental Working Group (EWG) who wants cleaner air. I urge the California Air Resources Board to adopt the 2010 Consumer Products Regulation Amendments. They would also create product-specific bans of key ingredients with significant health or environmental concerns, including alkylphenol ethoxylates, perchloroethylene and chemicals with high potential to worsen global warming.

As a resident of California for the past 50 years, I am proud of our state's commitment to lead the country in environmental standards. With 3 children, I am very concerned about the world we are leaving, and feel that global warming and toxins in the environment are the most critical issue for their future.
