Subject: strengthen your current perc phaseout proposal  
Comment:

Dear Dr. Sawyer and Board members:

I am very concerned about the use of the toxic chemical perchloroethylene (perc) used in dry cleaning. I want to thank you and the Board for voting last May to phase out this carcinogen. Your action will help protect the cleaners, customers and our neighborhoods.

I am writing you with three requests that will strengthen your current perc phaseout proposal:

1. People should not be exposed to perchloroethylene. Instead of the 15-year phaseout in your current proposal, speed up this process to a 10-year phaseout.
2. One alternative to perc dry cleaning causes smog. This is why I am also asking you to phase out new systems that use hydrocarbon solvents.
3. To provide immediate protection to those who need it most, require perc dry cleaners within 300 feet of residential zones, schools, medical facilities or other sensitive areas to be phased out by 2010.

Please continue to protect Californians from the health hazards of perchloroethylene by adopting these measures. Thank you.

Sincerely,

Comment:

January 11, 2007

Dr. Sawyer and Board members

Dear Dr. Sawyer and Board members:

I am writing to urge the prompt phase out of the toxic chemical perchloroethylene (perc) used in dry cleaning. I want to thank you and the Board for voting last May to phase out this carcinogen. Your action will help protect the cleaners, customers and our neighborhoods.

I am writing you with three requests that will strengthen your current perc phaseout proposal:

1. People should not be exposed to perchloroethylene. Instead of the 15-year phaseout in your current proposal, speed up this process to a 10-year phaseout.
2. One alternative to perc dry cleaning causes smog. This is why I am also asking you to phase out new systems that use hydrocarbon solvents.
3. To provide immediate protection to those who need it most, require perc dry cleaners within 300 feet of residential zones, schools, medical facilities or other sensitive areas to be phased out by 2010.

Please continue to protect Californians from the health hazards of perchloroethylene by adopting these measures.

Thank you for taking my concerns into consideration, as you move towards a definite timetable for PERC phase out.

Sincerely,

Gary A. Patton  
831-423-2984

Dr. Sawyer and Board members

Dear Dr. Sawyer and Board members:

I am very concerned about the use of the toxic chemical perchloroethylene (perc) used in dry cleaning. I want to thank you and the Board for voting last May to phase out this carcinogen. Your action will help protect the cleaners, customers and our neighborhoods.

I am writing you with three requests that will strengthen your current perc phaseout proposal:

1. People should not be exposed to perchloroethylene. Instead of the 15-year phaseout in your current proposal, speed up this process to a 10-year phaseout. 2. One alternative to perc dry cleaning causes smog. This is why I am also asking you to phase out new systems that use hydrocarbon solvents. 3. To provide immediate protection to those who need it most, require perc dry cleaners within 300 feet of residential zones, schools, medical facilities or other sensitive areas to be phased out by 2010.

Please continue to protect Californians from the health hazards of perchloroethylene by adopting these measures. Thank you.

Sincerely,

Jill Fields

Dear Dr. Sawyer and Board members:

We are both very concerned about the use of the toxic chemical perchloroethylene (perc) used in dry cleaning. Of course, we want to thank you and the Board for voting last May to phase out this carcinogen. Your action will help protect the cleaners, customers and our neighborhoods.

But we are writing you with three requests that will strengthen your current perc phaseout proposal:

1. People should not be exposed to perchloroethylene. Instead of the 15-year phaseout in your current proposal, speed up this process to a 10-year phaseout. 2. One alternative to perc dry cleaning causes smog. This is why we are also asking you to phase out new systems that use hydrocarbon solvents. 3. To provide immediate protection to those who need it most, require perc dry cleaners within 300 feet of residential zones, schools, medical facilities or other sensitive areas to be phased out by 2010.

Please continue to protect Californians from the health hazards of perchloroethylene by adopting these measures. Thank you.

Sincerely,

Elizabeth Simpson   John Wurr

Dr. Sawyer and Board members

Dear Dr. Sawyer and Board members:

As someone who has spoken out publicly about the need to remove the toxic chemical perchloroethylene from our environment, I am very concerned about the continuing use of perc in the dry cleaning industry.

My father passed away 14 years ago of metastatic kidney cancer attributed to perchloroethylene exposure during his career as a drycleaner.

While I want to thank you and the Board for voting last May to phase out this carcinogen, I am writing you with three requests that will strengthen your current perc phaseout proposal:

1. People should not be exposed to perchloroethylene. Instead of the 15-year phaseout in your current proposal, please speed up this process to a 10-year phaseout.

2. One alternative to perc dry cleaning causes smog. This is why I am also asking you to phase out new systems that use hydrocarbon solvents.

3. To provide immediate protection to those who need it most, require perc dry cleaners within 300 feet of residential zones, schools, medical facilities or other sensitive areas to phase out perc use by 2010.

Please continue to protect Californians from the health hazards of perchloroethylene by adopting these measures. With California taking the lead, let's hope and pray the rest of the nation follows suit.

Thank you.

Sincerely,

Scott Vineberg

Dear Dr. Sawyer and Board members:

I am very concerned about the use of the toxic chemical perchloroethylene (perc) used in dry cleaning. I want to thank you and the Board for voting last May to phase out this carcinogen. Your action will help protect the cleaners, customers and our neighborhoods.

I am writing you with three requests that will strengthen your current perc phaseout proposal:

1. People should not be exposed to perchloroethylene. Instead of the 15-year phaseout in your current proposal, speed up this process to a 10-year phaseout. 2. One alternative to perc dry cleaning causes smog. This is why I am also asking you to phase out new systems that use hydrocarbon solvents. 3. To provide immediate protection to those who need it most, require perc dry cleaners within 300 feet of residential zones, schools, medical facilities or other sensitive areas to be phased out by 2010.

Please continue to protect Californians from the health hazards of perchloroethylene by adopting these measures. Thank you.

Sincerely,

Lily Lee

3. To provide immediate protection to those who need it most, require perc dry cleaners within 300 feet of residential zones, schools, medical facilities or other sensitive areas to be phased out by 2010.

Please continue to protect Californians from the health hazards of perchloroethylene by adopting these measures. Thank you.

Sincerely,

John Silva

Dr. Sawyer and Board members

Dear Dr. Sawyer and Board members:

I am very concerned about the use of the toxic chemical perchloroethylene (perc) used in dry cleaning. I want to thank you and the Board for voting last May to phase out this carcinogen. Your action will help protect the cleaners, customers and our neighborhoods.

I am writing you with three requests that will strengthen your current perc phaseout proposal:

1. People should not be exposed to perchloroethylene. Instead of the 15-year phaseout in your current proposal, speed up this process to a 10-year phaseout. 2. One alternative to perc dry cleaning causes smog. This is why I am also asking you to phase out new systems that use hydrocarbon solvents. 3. To provide immediate protection to those who need it most, require perc dry cleaners within 300 feet of residential zones, schools, medical facilities or other sensitive areas to be phased out by 2010.

Please continue to protect Californians from the health hazards of perchloroethylene by adopting these measures. Thank you.

Sincerely,

Daniel Barnett

Dear Dr. Sawyer and Board members:

I am very concerned about the use of the toxic chemical  
perchloroethylene  
(perc) used in dry cleaning. I want to thank you and the Board for  
voting  
last May to phase out this carcinogen. Your action will help  
protect the  
cleaners, customers and our neighborhoods.

I am writing you with three requests that will strengthen your  
current  
perc phaseout proposal:

1. People should not be exposed to perchloroethylene. Instead of  
the  
15-year phaseout in your current proposal, speed up this process  
to a  
10-year phaseout. 2. One alternative to perc dry cleaning causes  
smog.  
This is why I am also asking you to phase out new systems that  
use  
hydrocarbon solvents. 3. To provide immediate protection to those  
who need  
it most, require perc dry cleaners within 300 feet of residential  
zones,  
schools, medical facilities or other sensitive areas to be phased  
out by  
2010.

Please continue to protect Californians from the health hazards  
of  
perchloroethylene by adopting these measures. Thank you.

Dr. Sawyer and Board members

Dear Dr. Sawyer and Board members:

I am very concerned about the use of the toxic chemical perchloroethylene (perc) used in dry cleaning. I want to thank you and the Board for voting last May to phase out this carcinogen. Your action will help protect the cleaners, customers and our neighborhoods.

I am writing you with three requests that will strengthen your current perc phaseout proposal:

1. People should not be exposed to perchloroethylene. Instead of the 15-year phaseout in your current proposal, speed up this process to a 10-year phaseout.
2. One alternative to perc dry cleaning causes smog. This is why I am also asking you to phase out new systems that use hydrocarbon solvents.
3. To provide immediate protection to those who need it most, require perc dry cleaners within 300 feet of residential zones, schools, medical facilities or other sensitive areas to be phased out by 2010.

Please continue to protect Californians from the health hazards of perchloroethylene by adopting these measures. Thank you.

Sincerely,

Francisco Costa

Dr. Sawyer and Board members

Dear Dr. Sawyer and Board members:

As a resident of Fresno, in the San Joaquin Valley, I am very concerned about the use of the toxic chemical perchloroethylene (perc) used in dry cleaning. We don't have any alternatives in our area that I can find. Many of our dry cleaners are located right next to daycares, residences and restaurants. Knowing how dangerous this chemical is makes me very worried about the locations of our dry cleaners.

I want to thank you and the Board for voting last May to phase out this carcinogen. Your action will help protect the cleaners, customers and our neighborhoods.

I am writing you with three requests that will strengthen your current perc phaseout proposal:

1. People should not be exposed to perchloroethylene. Instead of the 15-year phaseout in your current proposal, speed up this process to a 10-year phaseout.
2. One alternative to perc dry cleaning causes smog. This is why I am also asking you to phase out new systems that use hydrocarbon solvents.
3. To provide immediate protection to those who need

it most, require perc dry cleaners within 300 feet of residential zones, schools, medical facilities or other sensitive areas to be phased out by 2010.

Please continue to protect Californians from the health hazards of perchloroethylene by adopting these measures. Thank you.

Sincerely,

Sarah Sharpe

January 18, 2007

Dr. Sawyer and Board members

Dear Dr. Sawyer and Board members:

Estimado Dr. Sawyer y Miembros de la Mesa Directiva:

Como consumidor, me preocupa mucho que las tintorerías continúen utilizando el químico toxico percloroetileno (perc). Por tal motivo quiero agradecer que Usted y los otros miembros hayan votado para prohibir el uso de este carcinógeno. Su decisión ayudara a proteger a los empleados de las tintorerías, sus clientes y vecinos.

Les estoy escribiendo para pedir que adopte las siguientes alternativas, las cuales reforzarán aun más la propuesta para eliminar el perc que se utiliza en las tintorerías:

1. La comunidad no debería continuar siendo expuesta al percloroetileno. En vez de alargar el proceso durante 15 años, la eliminación del perc solo debería tomar 10 años.
2. Una de las alternativas a la técnica que utiliza el perc para limpiar la ropa causa smog. Es por eso que le pido que también prohíba el uso de sistemas a base de solventes de hidrocarbano.
3. Para proveer protección inmediata a aquellos que mas la necesitan, es importante que para el año 2010 ya se haya prohibido el perc en tintorerías a menos de 300 pies de distancia de zonas residenciales, escuelas, centros médicos, u otros receptores sensitivos.

Por favor continúen protegiendo a los californianos de los peligros que el perc representa para la salud pública al adoptar estas propuestas.

Muchas gracias.

Sinceramente,

Sincerely,

Anai Ibarra-Lopez

I am very concerned about the use of the toxic chemical perchloroethylene (perc) used in dry cleaning. I want to thank you and the Board for voting last May to phase out this carcinogen. Your action will help protect the cleaners, customers and our neighborhoods.

I am writing you with three requests that will strengthen your current perc phaseout proposal:

1. People should not be exposed to perchloroethylene. Instead of the 15-year phaseout in your current proposal, speed up this process to a 10-year phaseout.
2. One alternative to perc dry cleaning causes smog. This is why I am also asking you to phase out new systems that use hydrocarbon solvents.
3. To provide immediate protection to those who need it most, require perc dry cleaners within 300 feet of residential zones, schools, medical facilities or other sensitive areas to be phased out by 2010.

Please continue to protect Californians from the health hazards of perchloroethylene by adopting these measures. Thank you.

Sincerely,

Maria Siciliano

merced, CA 95340-3122

January 19, 2007

Dr. Sawyer and Board members

Dear Dr. Sawyer and Board members:

Estimado Dr. Sawyer y Miembros de la Mesa Directiva:

Como consumidor, me preocupa mucho que las tintorerías continúen utilizando el químico tóxico percloroetileno (perc). Por tal motivo quiero agradecer que Usted y los otros miembros hayan votado para prohibir el uso de este carcinógeno. Su decisión ayudara a proteger a los empleados de las tintorerías, sus clientes y vecinos.

Les estoy escribiendo para pedir que adopte las siguientes alternativas, las cuales reforzarán aun más la propuesta para eliminar el perc que se utiliza en las tintorerías:

1. La comunidad no debería continuar siendo expuesta al percloroetileno. En vez de alargar el proceso durante 15 años, la eliminación del perc solo debería tomar 10 años.
2. Una de las alternativas a la técnica que utiliza el perc para limpiar la ropa causa smog. Es por eso que le pido que también prohíba el uso de sistemas a base de solventes de hidrocarburo.
3. Para proveer protección inmediata a aquellos que mas la necesitan, es importante que para el año 2010 ya se haya prohibido el perc en tintorerías a menos de 300 pies de distancia de zonas residenciales, escuelas, centros médicos, u otros receptores sensitivos.

Por favor continúen protegiendo a los californianos de los peligros que el perc representa para la salud pública al adoptar estas propuestas.

Muchas gracias.

Sinceramente,

Sincerely,

caroline kreide

Dr. Sawyer and Board members

Dear Dr. Sawyer and Board members:

I am very concerned about the use of the toxic chemical perchloroethylene (perc) used in dry cleaning. I want to thank you and the Board for voting last May to phase out this carcinogen. Your action will help protect the cleaners, customers and our neighborhoods.

I am writing you with three requests that will strengthen your current perc phaseout proposal:

1. People should not be exposed to perchloroethylene. Instead of the 15-year phaseout in your current proposal, speed up this process to a 10-year phaseout.
2. One alternative to perc dry cleaning causes smog. This is why I am also asking you to phase out new systems that use hydrocarbon solvents.
3. To provide immediate protection to those who need it most, require perc dry cleaners within 300 feet of residential zones,

schools, medical facilities or other sensitive areas to be phased out by 2010.

Please continue to protect Californians from the health hazards of perchloroethylene by adopting these measures. Thank you.

Sincerely,

Christa Jahnke

Dear Dr. Sawyer and Board members:

I am a clean-air activist who is extremely concerned about the use of of toxic perc in dry cleaning. Therefore, I get all of my dry cleaning done by an environmentally-aware cleaners that refuses to use this chemical. It is inexcusable, when there are cleaner dry cleaning methods available, that CARB has thus far allowed the dry cleaning industry to use this poison.

I am very concerned about the use of the toxic chemical perchloroethylene (perc) used in dry cleaning. I want to thank you and the Board for voting last May to phase out this carcinogen. Your action will help protect the cleaners, customers and our neighborhoods.

Dr. Sawyer and Board members

Dear Dr. Sawyer and Board members:

I am very concerned about the use of the toxic chemical perchloroethylene (perc) used in dry cleaning. I want to thank you and the Board for voting last May to phase out this carcinogen. Your action will help protect the cleaners, customers and our neighborhoods.

I am writing you with three requests that will strengthen your current perc phaseout proposal:

1. People should not be exposed to perchloroethylene. Instead of the 15-year phaseout in your current proposal, speed up this process to a 10-year phaseout. 2. One alternative to perc dry cleaning causes smog. This is why I am also asking you to phase out new systems that use hydrocarbon solvents. 3. To provide immediate protection to those who need it most, require perc dry cleaners within 300 feet of residential zones, schools, medical facilities or other sensitive areas to be phased out by 2010.

Please continue to protect Californians from the health hazards of perchloroethylene by adopting these measures. Thank you.

Sincerely,

Joseph Jacobs
