re: Enhanced Fleet Modernization Program Regulation (EFMP)

Dear Clerk of the Board,

I am appalled that you have proposed an additional \$30 million Fleet Modernization Program. Quite frankly, what planet are you on these days? Have you not read the state of California is near insolvency? That we can't afford our schools, parks, child health care, prisons and many other very basic things. There is absolutely no need to load the state budget with another \$30 annual expenditure to provide taxpayer monies to a selected few to get on the government hand out gravy train to buy a newer automobile. The automobile fleet is renewing itself, albeit at a slower pace in these difficult economic times, but it is still renewing and many of the newer cars are fuel efficient hybrids or other latest technology products.

Please record my strong disapproval of this latest boondoggle which you will hear on June 25.

Sincerely,

  
John F. Quilter

cc: Leland Yee, State Senator  
Jerry Hill, State Assemblyman  
Governor Arnold Schwarznegger
