Course # 511

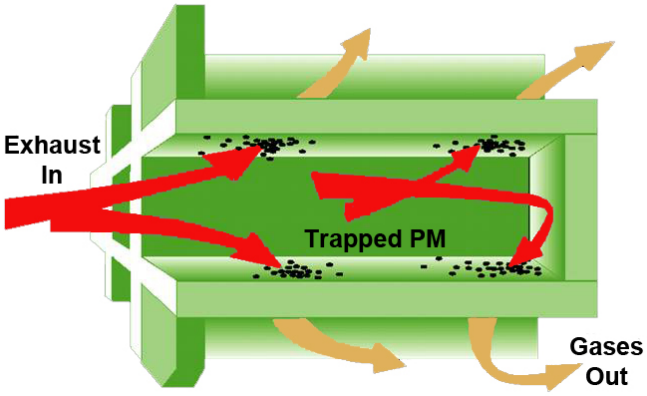
Diesel Exhaust After-Treatment Devices

Diesel exhaust after-treatment devices including diesel particulate filter (DPF) technology are in the forefront of California's Diesel Risk Reduction Program. Retrofit DPF's have been verified by ARB to effectively reduce diesel emissions from diesel-fueled internal combustion engines by at least 85%.

This course discusses the production of diesel emissions and their health effects; diesel emission control technology; DPF construction and application; and the maintenance necessary for successful DPF operation.

September 18, 2012

8:30 am – 4:30 pm



Johnson Power Systems
800 E. La Cadena Drive
Riverside, CA 92507
