Dear California Air Resource Board Member,

My name is Rebecca Barnes. I am a sixty year old female who has suffered from sinusitis for 20 years, taking 3 to 4 allergy pills daily. Every morning, I would wake up with a headache, my face would be swollen and I would have a stuffy nose from my sinusitis.

We purchased an EcoQuest Fresh Air Purifier and after a few days of home usage, I no longer woke up with a headache, a swollen face or stuffy nose. For the first time in 20 years, no more sinusitis, no more allergy pills, and I feel great and energized.

The EcoQuest Fresh Air Purifier has also been a primary help during our home remodeling. We used the EcoQuest Fresh Air Purifier to remove mold from bathroom tile and walls. Before we started the bathroom remodeling, we set the EcoQuest Fresh Air Purifier to the "away" mode, the highest setting, for two hours. Then we directed the water from the shower head onto the mold, and to our surprise, the mold washed off the tile and walls, and with only a mild cleaner the walls and tile now wiped clean.

My health as well as the health of my family has been greatly improved from the use of our EcoQuest Fresh Air Purifier. The EcoQuest Fresh Air Purifier has improved our quality of life.

I oppose the current CA AREB staff proposed regulation for limiting ozone emissions from indoor air cleaning devices because it could take away my Freedom of Choice in selecting the EcoQuest Fresh Air Purifier.

Thank you,

Rebecca Barnes
