

January 25, 2012

Mary D. Nichols
Chairman
California Air Resources Board
Headquarters Building
1001 "I" Street
Sacramento, CA 95812

Dear Chairman Nichols and CARB Board Members:

California has led the nation and the world in protecting public health with clean car standards for more than 50 years. Thank you for continuing to make California a leader in innovation with proposed vehicle and fuel policies that will cut vehicle pollution, guarantee consumer access to clean fuels, and foster the development of electric-car technology.

We support the proposed changes to the Zero Emissions Vehicles program while urging California Air Resources Board officials to strengthen the proposal by raising the requirement for battery, fuel cell, and plug-in hybrid electric vehicles to account for 1.8 million new vehicle sales in the state between 2018 and 2025 and by eliminating or significantly modifying provisions that allow automakers to avoid meeting the full requirements.

We support the state's proposals to reduce global warming emissions for vehicles built between 2017 and 2025 to 166 grams per mile.

We support the proposal to reduce smog-forming emissions from new cars and light truck tailpipes by 75 percent by 2025 and a reduction in toxic particulate matter by 2028, while urging California Air Resources Board officials to move up the date on toxic particulates to 2022.

We support the proposals for the Clean Fuels Outlet rules to ensure California consumers have access to hydrogen fuel and electricity for advanced vehicles.

Thank you for providing a vision for a cleaner transportation future for California with this inspiring package of clean car standards.

Signed,

Rachel Aarons, Santa Barbara, CA
