Air Resources Board
1001 "I" Street
P.O. Box 2815
Sacramento, Ca

To Whom It Concerns,

I am a 94 year old woman who is on a fixed income. I know that the Air Board regulators are trying to look out for the public's best interest, but if the Air Board passes AB32 (diesel emission reduction), every product in this state will be priced higher.

Historically, when new regulations are forced upon an industry, such as the one being proposed in the trucking industry, then the new regulations will cost them more money. Then, that increase is passed along to people like me. Look at gasoline. Environmental regulations in California have forced me to pay more for gas than any other state. This will happen if AB32 is passed.

On my fixed income, I can not afford any more increases.

Please consider those who can not increase their incomes and those who can not work for extra money just to pay for the inevitable trucking increases because of AB32.

Sincerely,

A handwritten signature in cursive script that reads "Estelle Williams".
