

Status of Terminal Plan Submittals  
October 2009

The Air Resources Board has received 28 terminal plans for facilities located at the ports of Hueneme, Long Beach, Los Angeles, Oakland, San Diego, and San Francisco. These plans indicate that all facilities plan to install grid-based shore power systems. In addition, three terminals will receive visits from fleets using alternative control technologies. For questions on the terminal plans, please contact Grant Chin, at 916-327-5602 or at [gchin@arb.ca.gov](mailto:gchin@arb.ca.gov).
