* Based on designations of areas as "nonattainment" in sections 60200-60209, Title 17, CCR

** The values in this column are calculated by dividing \$2,829,564 by the total statewide emissions subject to this regulation, and multiplying that value by the total emissions subject to this regulation in a district. Because the per-ton fee of \$18.78 has been rounded off, the proposed fee for an individual district will not be exactly equal to the total emissions in the district multiplied by \$18.78.
