In October 2007, the Board adopted the Reserve's Forest Protocols (version 2.1) for use in voluntary greenhouse gas reduction projects. During that Board meeting, the Board also directed staff to initiate a process to update the forest protocols with additional accounting procedures in order to encourage greater participation in forest projects by other types of landowners, particularly publicly-owned lands and industrial working forests. ARB staff contracted with the Reserve to develop the updates to the protocol. On September 1, 2009, the Climate Action Reserve adopted the updated Forest Project Protocol (version 3.0). ARB staff is recommending that the Board adopt the updated Climate Action Reserve Forest Project Protocol (version 3.0) as a technically sound quantification methodology for greenhouse gas accounting for voluntary reduction projects.

ARB staff will present a written report and make an oral presentation at the meeting. Copies of the report may be obtained from ARB's Public Information Office at 1001 I Street, First Floor, Environmental Services Center, Sacramento, California, 95814, (916) 322-2990, September 15, 2009.
