

State of California
AIR RESOURCES BOARD

EXECUTIVE ORDER N-12-007

Relating to ARB Approval for an Exemption from Third Party Certification for Composite Wood Product Manufacturers that use Ultra-low-emitting Formaldehyde Resins under section 93120.3, title 17, California Code of Regulations

Masonite International, Laurel, Mississippi (Masonite-Laurel)

WHEREAS, the Air Resources Board (ARB) has adopted the "Airborne Toxic Control Measure to Reduce Formaldehyde Emissions from Composite Wood Products" (the "ATCM"; title 17, California Code of Regulations, sections 93120-93120.12), which establishes formaldehyde emission standards for composite wood products;

WHEREAS, section 93120.1(a) of the ATCM defines "ultra-low-emitting formaldehyde (ULEF) resins" to mean "resins formulated such that average formaldehyde emissions are consistently below the Phase 2 emission standards in section 93120.2," for making hardwood plywood, particleboard, or medium density fiberboard;

WHEREAS, section 93120.3(d) of the ATCM allows manufacturers of hardwood plywood, particleboard, and medium density fiberboard who use ULEF resins to apply for written approval from the Executive Officer for an exemption from the requirements of section 93120.3(b) of the ATCM;

WHEREAS, section 93120.3(d) of the ATCM allows manufacturers of hardwood plywood, particleboard, and medium density fiberboard who use ULEF resins to submit an application for an exemption from the requirements of section 93120.3(b) of the ATCM to the Executive Officer, which includes: (A) a statement indicating which product types will be manufactured using ULEF resins for sale in California; (B) the chemical formulation of the candidate ULEF resin(s), including base resins, scavenger resins, scavenger additives, catalysts, and other additives as used in manufacturing; (C) the name of their ARB approved third party certifier; and (D) data on the emissions performance of the candidate ULEF resin(s);

WHEREAS, the data on emissions performance of the candidate ULEF resin required in section 93120.3(d) of the ATCM must be obtained by working with an ARB approved third party certifier, and must include six months of routine quality control testing data, the correlation of the routine quality control testing data to primary or secondary testing data, and the results of two primary or secondary method tests, as required in Appendix 2 of section 93120.12 of the ATCM;

WHEREAS, section 93120.3(d)(2) of the ATCM requires that ninety percent of the six months of routine quality control testing data and the results of two primary or secondary method tests must be shown to be no higher than 0.04 ppm, and that all data must be shown to be no higher than 0.05 ppm for hardwood plywood and 0.06 ppm for particleboard, medium density fiberboard, and thin medium density fiberboard;

WHEREAS, section 93120.3(d)(5) of the ATCM provides that the Executive Officer shall approve the application and issue an Executive Order if the evidence submitted by the applicant is sufficient to demonstrate that the applicant has met the requirements specified in sections 93120.3(d)(1) and 93120.3(d)(2) of the ATCM;

WHEREAS, Masonite International, Laurel, Mississippi (Masonite-Laurel or the "applicant") submitted an original application dated November 20, 2008;

WHEREAS, the original application from Masonite-Laurel specifies the range in product manufacturing parameters, applicable post-press product treatments, base resin trade name(s) and base resin manufacturer(s)/supplier(s), and other ingredients added to the base resin by the applicant to manufacture ULEF-exempt thin medium density fiberboard products;

WHEREAS, the original application from Masonite-Laurel contains base resin/adhesive information specifying the base resin polymer type and minimum and maximum values of all major and any minor ingredients in the base resin on percent weight of solids basis;

WHEREAS, the original application from Masonite-Laurel was deemed complete on February 2, 2008, and Masonite-Laurel was issued Executive Order N-09-007 signed on February 17, 2009, listing specific formulation data and operating parameters in Confidential Attachment A;

WHEREAS, Masonite-Laurel submitted a request and supplementary data to ARB on January 28, 2010, for approval to modify the operating parameters in Confidential Attachment A;

WHEREAS, the request and supplementary confirmatory and small-scale testing data demonstrates that the modification requested by Masonite-Laurel enables them to continue manufacturing thin medium density fiberboard that qualifies as an ULEF composite wood product under Executive Order N-09-007;

WHEREAS, the Executive Officer approved Masonite-Laurel's request for a modification, and Executive Order N-09-007 was superseded by Executive Order N-09-007A, signed on February 10, 2010;

WHEREAS, section 93120.3(d) of the ATCM allows ULEF product manufacturers to apply for re-approval to ARB by submitting an updated application;

WHEREAS, Masonite-Laurel submitted an updated application for re-approval to ARB on April 11, 2012;

WHEREAS, ARB was provided base resin/adhesive information specifying the base resin polymer type and minimum and maximum values of all major and minor ingredients in the base resin on a percent weight of solids basis by Georgia-Pacific Chemicals, Masonite-Laurel's resin supplier;

WHEREAS, the updated application for re-approval from Masonite-Laurel was deemed complete on April 17, 2012;

WHEREAS, the Executive Officer finds that the completed, updated application demonstrated the ULEF manufacturer's ability to continue to comply with section 93120(d); and

WHEREAS, the Executive Officer approved Masonite-Laurel's request for re-approval, and it is appropriate that Executive Order N-09-007A be superseded by this Executive Order N-12-007.

NOW, THEREFORE, IT IS ORDERED that Masonite-Laurel is hereby approved as a ULEF manufacturer of thin medium density fiberboard that is exempt from the requirements of section 93120.3(b) and Appendix 2 of section 93120.12 of the ATCM, provided that the following terms and conditions are met for products sold, supplied, offered for sale, or manufactured for sale in California;

1. Masonite-Laurel must use the commercial resins listed and suppliers listed in section A of Confidential Attachment A of this Executive Order for the manufacture of ULEF composite wood products.
2. The chemical formulation of the base resins used for the manufacture of ULEF composite wood products by Masonite-Laurel must be within the ranges specified in section B of Confidential Attachment A of this Executive Order.
3. The application rate of the base resins used for the manufacture of ULEF composite wood products by Masonite-Laurel must be within the ranges specified in section C of Confidential Attachment A of this Executive Order.
4. Other chemical components of the base resins (such as sizing wax and release wax) used for the manufacture of ULEF composite wood products by Masonite-Laurel must be within the ranges specified in section D of Confidential Attachment A of this Executive Order.
5. The allowable operating parameters for press temperature and press time for the base resins used to manufacture the ULEF composite wood products by Masonite-Laurel must be within the ranges specified in section E of Confidential Attachment A of this Executive Order.

6. Only the composite wood products with the product names listed in section F of Confidential Attachment A of this Executive Order are authorized under this Executive Order.

BE IT FURTHER ORDERED that this Executive Order N-12-007 supersedes Executive Order N-09-007A, which was issued on February 10, 2010;

BE IT FURTHER ORDERED that Masonite-Laurel may change the resin system supplier listed in section A of Confidential Attachment A of this Executive Order if the new resin supplier supplies the same resin type listed in Confidential Attachment A of this Executive Order, at least two primary or secondary method tests are performed on random samples selected by their ARB-approved third party certifier, and the Chief of the Emissions Assessment Branch of the Stationary Source Division is notified before Masonite-Laurel uses the resin for production;

BE IT FURTHER ORDERED that Masonite-Laurel must conduct confirmatory testing for a new resin supplier by demonstrating that the results of two primary or secondary method tests for the new resin system supplier are no higher than 0.04 ppm for the ULEF products authorized under this Executive Order;

BE IT FURTHER ORDERED that this Executive Order shall have a duration of two years from the date this Executive Order is signed; the applicant may apply for re-approval as provided in section 93120.3(d)(5) of the ATCM.

BE IT FURTHER ORDERED that the applicant must maintain records in electronic or hard copy form for two years, for review by ARB upon request, as specified in section 93120.3(g) of the ATCM.

BE IT FURTHER ORDERED that the applicant must notify the Executive Officer in writing within 30 days if there is any change in their product manufacturing parameters or base resin manufacturer(s) or supplier(s) that does not comply with any of the requirements, terms or conditions specified in the ATCM or this Executive Order.

Executed at Sacramento, California this 25th day of April, 2012.

Daniel E. Donohue, Chief
Emissions Assessment Branch
Stationary Source Division
