July 11, 2011

TO: All Vapor Recovery Stakeholders

Dear Sir or Madam:

The California Air Resources Board (ARB) staff will hold a public meeting to discuss proposed improvements to ARB's In-Use Vapor Recovery Program for the purpose of assessing the in-use performance of enhanced vapor recovery (EVR) equipment installed at gasoline dispensing facilities (GDF).

The time and place for the workshop are as follows:

DATE: Thursday, July 28, 2011

TIME: 1:30 p.m. to 3:30 p.m., PST

PLACE: California Air Resources Board
Monitoring and Laboratory Division
1927 13th Street, 1st Floor Conference Room
Sacramento, California 95811

TELECONFERENCE: To participate via teleconference, please contact Elizabeth Mongar at (916) 327-0900 no later than July 21.

All provisions of the ARB EVR program for GDFs with underground storage tanks have been implemented throughout California. The current focus is to explore opportunities to improve the regulatory process for evaluating vapor recovery equipment in the field, with an emphasis on early detection of potential equipment deficiencies and timely corrective action.

This meeting will include a presentation by staff on proposed in-use program improvements followed by a comment and suggestion period. An agenda will be posted on <http://www.arb.ca.gov/vapor/vapor.htm> by no later than July 22, 2011. Teleconference information will be included in the agenda. Enclosed is the parking information.

The energy challenge facing California is real. Every Californian needs to take immediate action to reduce energy consumption. For a list of simple ways you can reduce demand and cut your energy costs, see our website: <http://www.arb.ca.gov>.
