## TRANSPORT REFRIGERATION UNIT ATCM MODEL-ENGINE-COMPLIANCE INFORMATION FORM

SSD/EAB-FORM #TRU-MEC (#30)

Check here if applying for early compliance consideration. Please submit a ULETRU Application Extension Form (see TRU Advisory 08-12 and SSD/EAB Form #27).

**Compliance Options:** Choose one of three options: Retrofit, Alternative Technology, or None.

1.  Retrofitted with Verified Diesel Emission Control Strategy (VDECS).

Check box if the retrofitted engine is a Flexibility Engine (see TRU Advisory 08-07)

Provide the following information from the emission control label:

Manufacturer Name

Family Name  Manufacture Date (MM-YY)

Serial Number  VDECS Installation Date

Complete the information below on business or person who installed VDECS:

Installer Name

Installer Mailing Address

Installer City  Installer State

Installer Zip  Installer Phone with area code

2.  Alternative Technology

Choose one of the three following types of alternative technologies. If applicable, check the type and provide the date the technology was first employed. Additional record keeping requirements apply to all of these compliance options.

A.  Electric Standby

B.  Cryogenic Temperature Control System

C.  Alternative Fuel (check one fuel type):

CNG (Compressed Natural Gas)

LPG (Liquefied Petroleum Gas)

Date alternative technology was implemented

3.  None of the Above

Checking this box indicates you have not installed VDECS or Alternative Technology. This may be because the engine's compliance data is still in the future.
