# Analysis of Building Characteristics and Indoor Environmental Quality in California Classrooms

Westat

Robert Paul Clickner, Ph.D.

\$116,780 (18 months)

Co-funded by CEC

## OBJECTIVE

**Further analyze variables on ventilation, other energy-related factors, and socioeconomic indicators, and examine relationships with indoor air quality and other environmental characteristics.**

# EXPECTED RESULTS

**Additional analyses of the Portable Classrooms Study data will help:**

- **ARB refine specific recommendations for preventing indoor environmental quality problems (IEQ) in schools, and**
- **CEC to improve energy efficiency and IEQ in schools through revised ventilation standards.**
