

Air Quality in Emergency Response:
Monitoring, Modeling, Messaging, and Media

Actionable

CARPA Steering Committee Members

California Air Resources Board, Governor's Office of Emergency Services, US EPA- Region 9, Agency for Toxic Substances and Disease Registry (Regional Office), Lawrence Livermore National Laboratory (LLNL)/National Atmospheric Release Advisory Center (NARAC)/ Interim Interagency Modeling and Atmospheric Assessment Center (IIMAC), California Air Pollution Control Officer's Association, Office of Environmental Health Hazard Assessment, California Conference of Local Public Health Officers, California National Guard 95th Civil Support Team, Department of Public Health, Sacramento City Fire Department Special Operations Unit, and the California Environmental Protection Agency.

The act of developing and summarizing information, whether it be from a piece of instrumentation or technical assessment that can be used readily, and with little interpretation or qualification by a public health official to make a statement about the safety of the air during an emergency.

Actionable requires the data be **timely** to promote expedient action, **accurate** enough to suite the health metric used, **accessible** to all levels of government, **usable** with little or no need for third party interpretation, and **relevant** to the chemical, breakdown product, or resultant mixture of multiple chemicals.
