

## Vintage 2016 Allowance Allocation

This document provides a summary of the vintage 2016 free allowance allocation under the Cap-and-Trade Program, aggregated both by allocation methodology and, within the industrial allocation category, by North American Industry Classification System (NAICS) sector. The methodologies for allowance allocation can be found in Cap-and-Trade Regulation sections 95852(j), 95852(k), 95870, 95890, 95891, 95893, 95894, and 95895. Details on allocation to electrical distribution utilities are not included in this document and are instead posted online at <http://www.arb.ca.gov/cc/capandtrade/allowanceallocation/electricity-allocation-2013-updates.pdf>.

Because facility-level allocation could reveal confidential business information, the total allocation for each allocation methodology and allocation to each industrial sector with fewer than five companies are grouped together. For facilities with a limited exemption of emissions from the production of qualified thermal output and waste-to-energy facilities, allowance allocation is provided at the facility level. These facilities are allocated allowances equal to each facility's 2014 covered emissions, which are already public data and therefore not confidential.

Detailed information regarding allocation for industrial and other sectors may be found at the following links:

1. [Allowance allocation web page](#)
2. 2010 Cap-and-Trade Regulation
  - a. Initial Statement of Reasons: [Appendix J—Allowance Allocation](#)
  - b. First 15-Day Modifications July 25, 2011: [Appendix B—Development of Product Benchmarks for Allowance Allocation](#)
  - c. Second 15-Day Modifications September 27, 2011: [Appendix A—Refinery Allocation Methodology](#)
3. 2013 Cap-and-Trade Regulation
  - a. [Initial Statement of Reasons](#) (for information on allocation to universities and public services facilities, natural gas suppliers, legacy contract generators, and public wholesale water agencies, as well as for the limited exemption of emissions from qualified thermal output and waste-to-energy facilities) and 45-Day Modifications September 4, 2013: [Appendix C: Product-Based Benchmark Development](#)
  - b. 15-Day Modifications March 21, 2014: [Appendix A: Product-Based Benchmark Development](#)

The “Total Allocation” numbers below reflect the sum of positive allowances distributed to eligible entities. This value does not include any negative allocation that will carry over into the next allocation distribution. For more information on negative allocation, see Cap-and-Trade Regulation section 95870(j). The “Total True-up Value” numbers below reflect the sum of positive true-up values. True-up value is a quantity of vintage 2016 allowances eligible to be used for compliance for budget year 2014 and subsequent years.

Questions regarding allocation may be directed to David Allgood at (916) 445-8238 or [David.Allgood@arb.ca.gov](mailto:David.Allgood@arb.ca.gov).
