

Evaluation Criteria for Providing Benefits To Priority Populations CLEAN TRANSPORTATION AND EQUIPMENT

California Climate Investments 2018 Funding Guidelines Benefit Criteria Table

Project Type: CLEAN TRANSPORTATION AND EQUIPMENT

California Climate Investments are required to meet minimum levels of investments to projects that benefit residents of disadvantaged communities, low-income communities, and low-income households, collectively referred to as “priority populations.”

All projects counting toward the statutory investment minimums must be located within an identified community and benefit individuals living within that community, or directly benefit residents of low-income households anywhere in the State. Administering agencies must determine if a project meets the criteria for providing direct, meaningful, and assured benefits to priority populations using the following evaluation approach:

Step 1: Identify the Priority Population(s). Be located within a census tract identified as a disadvantaged community or low-income community, or directly benefit residents of a low-income household;

Step 2: Address a Need. Meaningfully address an important community or household need for the disadvantaged community, low-income community, or low-income household; and

Step 3: Provide a Benefit. Using the evaluation criteria, identify at least one direct, meaningful, and assured benefit that the project provides to priority populations. The benefit provided must directly address the identified need.

Only investments that meet these criteria will be counted toward achieving the statutory investment minimums identified for priority populations. Administering agencies can fund projects that otherwise provide meaningful benefits, but do not meet these criteria; however, those projects will not be counted toward investment minimums.

The following table includes criteria for administering agencies to use to determine whether projects satisfy each of the three steps. The criteria are designed to enable administering agencies to readily make an objective “yes” or “no” decision about whether a particular project provides a benefit to a priority population.

Administering agencies must use the criteria table that is applicable to the specific project type(s) funded. For complex projects, there may be more than one applicable criteria table. A complete list of available criteria tables is available at:

www.arb.ca.gov/cci-fundingguidelines.

Administering agencies must refer to CARB’s Funding Guidelines for direction on how to use the criteria table in program design and implementation, project evaluation, project selection, and reporting (www.arb.ca.gov/cci-fundingguidelines).

Evaluation Criteria for Providing Benefits To Priority Populations
CLEAN TRANSPORTATION AND EQUIPMENT

Project Type: Projects will offer incentives for zero- and near zero-emission passenger vehicles, buses, trucks, freight technology, and/or off-road vehicles and equipment, including for the replacement of older, higher-emitting vehicles and equipment, or will produce renewable, low-carbon transportation fuel.

Projects must satisfy the applicable criteria through Step 3 to be considered to provide direct, meaningful, and assured benefits to priority populations and count toward statutory investment minimums.

Step 1 – Identify the Priority Population(s).¹ Evaluate the project against each of the following criteria. Check all boxes that apply.

Note: For this project type, the project location may be determined by where the vehicle or equipment is registered, domiciled, or operated a majority of the time. For projects that produce low carbon transportation fuel, the project location may be determined by the vehicles or equipment that use the majority of the fuel produced. For projects that offer consumer-based incentives (e.g., vouchers, rebates, transit passes), the project location may be determined by the residence of the direct recipient. For projects that offer incentives for transit vehicles, at least one stop or station served by the vehicle must be within a disadvantaged or low-income community census tract. For projects located at freight facilities or hubs, the freight facility or hub must be at least partially within a disadvantaged or low-income community census tract.

- A. Is the project located within the boundaries of a **disadvantaged community census tract**?
- B. Is the project located within the boundaries of a **low-income community census tract**?
- C. Is the project located outside of a disadvantaged community, but **within ½-mile of a disadvantaged community and within a low-income community census tract**?
- D. Is the project located within the boundaries of a **low-income household**?

If a project does not meet at least one of the qualifying criteria in Step 1, the project does not count toward statutory investment minimums and no further evaluation is needed. If the project meets at least one Step 1 criterion, continue the evaluation in Step 2.

¹ An online mapping tool of identified disadvantaged communities and low-income communities, and a “look-up” tool list of “low-income” thresholds by county and household size are available at: <https://www.arb.ca.gov/cci-communityinvestments>.

**Evaluation Criteria for Providing Benefits To Priority Populations
CLEAN TRANSPORTATION AND EQUIPMENT**

Step 2 – Address a Need. *Identify an important community or household need and evaluate whether the project provides a benefit that meaningfully addresses that need.*

To identify a need that the project will address, agencies and/or applicants can use a variety of approaches:

- A. **Recommended Approach:** Host community meetings, workshops, outreach efforts, or public meetings as part of the planning process to engage local residents and community groups for input on community or household needs, and document how the received input was considered in the design and/or selection of projects to address those needs;
- B. **Recommended Approach:** Receive documentation of support from local community-based organizations and/or residents (e.g., letters, emails) identifying a need that the project addresses and demonstrating that the project has broad community support;
- C. **Alternative Approach:** Where direct engagement is infeasible, look at the individual factors in CalEnviroScreen that are most impacting an identified disadvantaged or low-income community (i.e., factors that score above the 75th percentile), and confirm that the project will reduce the impacts of at least one of those factors; or
- D. **Alternative Approach:** Where direct engagement is infeasible, refer to the list of common needs for priority populations in CARB’s Funding Guidelines Table 5 and confirm that the project addresses at least one listed need.

Describe identified community or household need(s):

If the project addresses a community or household need as described in Step 2, proceed to Step 3. If the project does not address a community or household need, it will not count toward statutory investment minimums and no further evaluation is needed.

Evaluation Criteria for Providing Benefits To Priority Populations
CLEAN TRANSPORTATION AND EQUIPMENT

Step 3 – Provide a Benefit. Evaluate the project against each of the following criteria to determine if it provides direct, meaningful, and assured benefits to priority populations. The benefit provided must directly address the identified need.

Project must meet at least one of the following benefit criteria:

- A. Project provides incentives for vehicles, equipment, or renewable transportation fuel that reduce criteria air pollutant or toxic air contaminant emissions, such as diesel particulate matter;
- B. Project provides greater mobility and increased access to clean transportation for residents of a disadvantaged or low-income community by placing services in that community, including ride-sharing, car-sharing, or other advanced technology mobility options (e.g., neighborhood electric vehicles, vanpooling, shuttles, smartphone application-based ride-sharing services, bike-sharing services);
- C. Project provides greater mobility and increased access to clean transportation for residents of a disadvantaged or low-income community, or a low-income household, by providing incentives for the retirement or replacement of older, higher-emitting vehicles.

If the project meets the criteria in Steps 1, 2, and 3, it will be considered as providing direct, meaningful, and assured benefits to priority populations and will be counted toward statutory investment minimums.
