The California Resource Recovery Association (CRRA) is the statewide non-profit recycling organization. CRRA's more than 550 members represent all aspects of California's recycling community.

The CRRA Board formed the Recyclers Global Warming Council earlier this year, and charged the Council with addressing the role that reducing, reusing, recycling and composting discarded materials can play in reducing greenhouse gases.

The Recyclers Global Warming Council presented the attached Resource Plan to Reduce Greenhouse Gases and Reduce Landfill Disposal to the California Integrated Waste Management Board at its May 8, 2007 meeting.

The CRRA Board endorses this Resource Plan, and urges that it be incorporated into the report being prepared by the Economic and Technology Advancement Advisory Committee.

Sincerely,

Julie Muir  
President
