Steve,

I hope all is well. I was hoping to provide more thorough comments on this report but, but there's just never enough time. That said, we do want to highlight one topic that seemed to be missing – the use of biomethane as a transportation fuel. Comments on this are attached. I hope they are helpful.

I didn't include it in our comments, but we also strongly support policies to address black carbon, which was mentioned in the report.

Thanks, and have a good weekend.

Jamie
