Including Cap-and-Trade in California's portfolio of 2030 climate programs is the most cost effective way of achieving the SB 32 target and helps maintain California's economic strength while improving quality of life.

Cap-and-trade is 4X less costly

TO CALIFORNIA HOUSEHOLDS THAN ALTERNATIVE REGULATIONS

That could have been imposed

The Scoping Plan will lead to

PUBLIC HEALTH BENEFITS IN 2030 WILL LEAD TO $2 billion IN AVOIDED HEALTH IMPACTS VALUE

Cap-and-Trade helps California meet its carbon pollution reduction goals

The Scoping Plan with Cap-and-Trade is

35%

MORE LIKELY TO ACHIEVE California's 2030 GHG target compared to command-and-control only alternatives

If California is not on track to meet the target, additional regulatory actions would be needed
Cap-and-Trade generates revenue to invest in disadvantaged communities & clean technology.

Projects are underway in 98% of the state’s disadvantaged communities.

Since 2014, $6.1 Billion appropriated for:
- Affordable housing
- Public transportation
- Renewable energy
- Zero-emission vehicles
- Environmental restoration
- Recycling
- Sustainable agriculture
- And much more
