

PM10 Concentrations at Wilmington 11/01- 5/02

Site	Maximum	Average	# of Days above Standard
Wilmington	78	35	4 out of 19
Hawaiian	80	41	5 out of 18
North Long Beach	56	30	1 out of 19
Downtown LA	65	35	4 out of 19

* This was a matched day analysis. Units are ug/m3

** During the November 2001 to May 2002 period, average PM10 levels at the Wilmington Park School were comparable to the Downtown Los Angeles site, although the levels did not correlate on a day-to-day basis. Wilmington PM10 levels correlate well with the North Long Beach site. Hawaiian School PM10 levels and frequency of exceedances were slightly higher during this time period than the Wilmington site and two long term sites.
