Reporting Tool for 2014 Survey**

California Air Resources Board
October 23, 2014

Agenda Suggestions

- Survey overview
- Questions on Survey
- ACRT demonstration
- Questions on ACRT
- Next steps

Background

- ARB began conducting Architectural Coatings Surveys in 1976
- The 2014 Architectural Coatings Survey will be the ninth survey conducted
- Information collected is used to help the ARB and air districts track volatile organic compound (VOC) emissions from these coatings
- Survey results may be used in the development of regulations to reduce VOC emissions from architectural coatings

Recent Activity

- Draft 2014 Survey sent to districts in mid-July and comments received July 31, 2014
- District comments released to trade associations, meetings and conference calls held with associations and industry to refine 2014 Survey
- Draft 2014 Survey and Architectural Coatings Reporting Tool (ACRT) released mid-October

Important Dates

- Beta testing of ACRT and draft 2014 Survey comment period ends November 7, 2014
- December 1, 2014: Final ACRT release, start of 2014 Survey period
- December 16, 2014: Webinar on use of ACRT and upload portal
- January 1, 2015: Upload portal available
- May 1, 2015: Completed 2014 Survey due to ARB

What is new in the 2014 Survey

- Survey conducted electronically
- Submission of product labels
- Collection of data on colorants
- Collection of polymer and paraffin content for floor coating, concrete/masonry sealers, and waterproofing concrete/masonry sealers
- Addition of category codes to reflect coating categories regulated in the 2007 Suggested Control measure
- Addition of category code to capture data on Air and Water Resistive Barrier Coatings
