2015 Data Reporting for the Consumer Products Program: Product Category Exemptions

California Air Resources Board (ARB) staff has been reviewing the 2013 and 2014 data submitted by responsible parties as part of the Consumer and Commercial Products Survey. Based on ARB staff’s initial assessment of the reported data there were many categories with low or no volatile organic compound (VOC) emissions. In order to focus responsible party data reporting ARB staff is exempting categories with less than 0.05 tons per day of emissions from 2015 reporting. The list below describes the categories that are below the emission threshold. This list also includes aerosol adhesive and aerosol coating product categories that are also not required. In order to ensure these product categories are properly removed from reporting, ARB staff will not include them in the zip file download that will be used to populate the 2015 Consumer Products Reporting Tool.

NOTE: If a responsible party is reporting for the first time in 2016 and needs to report all three years, the exemptions in the table below only apply to 2015 data; 2013 and 2014 data reporting must include all product categories listed in Appendix A of the 2013 instructions, http://www.arb.ca.gov/consprod/regact/2013surv/cprt/appendix%20a%20%20list%20of%20survey%20categories.pdf. A slight exception to this scope is that aerosol coatings and aerosol adhesives only need to report 2013 sales.

NOTE: The 2013 data reporting instructions contain additional exemptions to this list such as fuel and prescription-only drugs. A more detailed description of these exemptions can be found on pages 3-4 of the instructions, http://www.arb.ca.gov/consprod/regact/2013surv/cprt/cprt_instructions.pdf.
