

RULE 107

Certification of Submissions and Emission Statements

(A) Submission Certification

- (1) All official documents submitted to the Antelope Valley Air Pollution Control District (District) shall contain a certification signed and dated by a responsible official of the company. This certification must attest that the information contained in the submitted documents is accurate to the best knowledge of the individual certifying the submission. The requirements of this Section apply to, but are not limited to, the emissions statements required in Section (B)(1).

(B) Emission Statement

- (1) In accordance with the requirements of the 1990 Clean Air Act (Section 182 (a)(3)(B)(i)), the owner or operator of any stationary source that emits or may emit oxides of nitrogen or Volatile Organic Compounds (VOCs) shall provide the Air Pollution Control Officer (APCO) with a written statement showing actual emissions of oxides of nitrogen and VOCs from that source. At a minimum the emission statement shall be submitted as specified in the transaction format detailed in the California Air Resources Board's "California Emission Inventory Development and Reporting System." The emission statement shall contain emission data for the time period specified by the APCO. Emission statements shall be submitted annually.
- (2) The APCO may waive the requirements of Section (B)(1) for any class or category of stationary sources which emit less than 25 tons per year of oxides of nitrogen or reactive organic compounds. The waiver is contingent on the District providing the California Air Resources Board with an inventory of sources emitting greater than 10 tons per year of nitrogen oxides or VOCs based on the use of emission factors acceptable to the California Air Resources Board and the United States Environmental Protection Agency.
