

COLUSA COUNTY AIR POLLUTION CONTROL DISTRICT

RULE 3.18 -- REGULATION OF CONSTRUCTION OR RECONSTRUCTION OF MAJOR SOURCES OF HAZARDOUS AIR POLLUTANTS PURSUANT TO FEDERAL CLEAN AIR ACT SECTION 112(g)

(adopted 10/02/01)

a. GENERAL

1. PURPOSE

The purpose of this rule is to require the installation of best available control technology for toxics (T-BACT) at any constructed or reconstructed major source of hazardous air pollutants (HAPs). All T-BACT determinations shall ensure a level of control that the Air Pollution Control Officer (APCO) has determined to be, at a minimum, no less stringent than new source maximum achievable control technology (MACT) as required by the federal Clean Air Act (CAA), Section 112 (g)(2)(B) and implemented through 40 CFR, subpart B 63.40-63.44.

2. APPLICABILITY

The requirements of this rule shall apply to all owners or operators that construct or reconstruct a major source of HAPs, unless the major source is exempt pursuant to section (4).

Compliance with this rule does not relieve any responsible official of a major source of HAPs from complying with all other District rules or regulations, any applicable State airborne toxic control measure (ATCM), or other applicable state and federal laws.

3. EFFECTIVE DATE:

This rule is effective on October 2, 2001.

4. EXEMPTIONS: The provisions of this rule do not apply to:

- A. Any major source that is subject to an existing National Emissions Standard (NESHAPs) for HAPs pursuant to sections 112 (d), 112 (h) or 112 (j) of the CAA;
- B. Any major source that has been specifically exempted from regulation under a NESHAP issued pursuant to sections 112 (d), 112 (h) or 112(j) of the CAA;
- A. Any major source that has received all necessary air quality permits for such construction or reconstruction project before June 29, 1998;
- B. Electric utility steam generating units, unless and until such time as these units are added to the source category list pursuant to section 112 (c)(5) of the CAA;
- C. Any stationary sources that are within a source category that has been deleted from the source category list pursuant to section 112 (c)(9) of the CAA;
- D. Research and development activities as defined in 40 CFR Part 63.41; and
- E. Any other stationary source exempted by section 112 of the CAA.

b. DEFINITIONS

Terms used in this rule that are not defined in this section have the meaning given to them in District Rule 1.2 *Definitions*.

1. BEST AVAILABLE CONTROL TECHNOLOGY FOR TOXICS (T-BACT)

A. T-BACT means the most effective emissions limitation or control technique which:

1. Has been achieved in practice for such permit unit category or class of sources; or
2. Is any other emissions limitation or control technique, including process and equipment changes of basic and control equipment, found by the Air Pollution Control Officer to be technologically feasible for such a category or class of sources, or for a specific source.

2. CONSTRUCT A MAJOR SOURCE

“Construct a Major Source” is defined in 40 CFR Part 63.41 - Definitions.

3. HAZARDOUS AIR POLLUTANT (HAPs)

A “Hazardous Air Pollutant” is any air pollutant listed in or pursuant to CAA, section 112 (b).

4. MAJOR SOURCE OF HAPs

A “Major Source of HAPs” is any stationary source or group of stationary sources located within a contiguous area and under common control that emits or has the potential to emit considering controls, in the aggregate, 10 tons per year or more of hazardous air pollutants or 25 tons per year or more of any combination of hazardous air pollutants.

5. POTENTIAL TO EMIT (PTE)

“Potential to Emit” is defined in CCAPCD Rule 3.17 (b)(23).

6. RECONSTRUCT A MAJOR SOURCE

“Reconstruct a Major Source” means the same as defined in 40 CFR Part 63.41 - Definitions.

c. REQUIREMENTS

No person shall construct a major source or reconstruct a major source of HAPs unless the APCO determines that the T-BACT requirements of this rule will be met.

d. CALCULATION PROCEDURES

The potential to emit for a source of HAP emissions shall equal the sum of the potentials to emit of the constructed or reconstructed source of HAPs. All fugitive HAP emissions associated with the construction or reconstruction shall be included in the potential to emit determination.

ADMINISTRATIVE PROCEDURES

An application for an Authority to Construct a major source or reconstruct a major source of HAPs shall be subject to the administrative procedures contained in Rule 3.6 (New Source Review) Section (f)(4). Any exemption from new source review noticing requirements in Rule 3.6 shall not apply. Construction may not begin until the District determines that the emission limitation equivalent to T-BACT will be met.
