

**Consumer Products and Architectural Coatings Manufacturers that are subject to the Nonvehicular Source, Consumer Products, and Architectural Coatings Fee Regulations (fee regulations) for fiscal year 2006-2007**

**Billing Issue (FY) 2006-2007**

We regret that we made a billing error in the fiscal year (FY) 2006-2007 invoices. The invoices for Consumer Products and Architectural Coatings Manufacturers regular fee was incorrectly billed \$106.90 per ton. The correct amount should have been \$111.15 per ton resulting in a \$4.25 per ton shortfall. To resolve this error we have rolled over the shortfall amount into the carryover balance for FY2007-2008, which have resulted in slightly higher fees in FY2007-2008.

**Please note:**

The dollar per ton fee amount is subject to change each year depending on: (1) any revisions in emissions information that we receive from facilities or manufacturers of architectural coatings or consumer products prior to final fee determinations, (2) the total amount of fees that ARB is authorized to collect by the final State budget, and (3) the prior year billing collections.
