

# Advisory

## Cargo Tank Vapor Recovery

Number 132

January 1996

### **CARGO TANK VAPOR RECOVERY CERTIFICATION**

The Air Resources Board is responsible for the gasoline cargo tank vapor recovery certification program. Health and Safety Code Section 41962 (g) provides that no person shall operate, or allow the operation of, a tank vehicle transporting gasoline and required to have a vapor recovery system, unless the system has been certified by the state board and is installed and maintained in compliance with the state board's requirements for certification.

Effective January 1, 1996, the Air Resources Board will administer the annual cargo tank vapor recovery certification program. The California Highway Patrol will no longer be responsible for the inspection and vapor recovery certification of cargo tanks as of this date.

Therefore, if you require vapor recovery certification for your cargo tank, application for the vapor recovery certification must be made to the **Air Resources Board, Compliance Division**. The testing and certification process is conducted according to the Air Resources Board's "Certification and Test Procedures for Vapor Recovery Systems of Gasoline Delivery Tanks." Enclosed is a copy of the Cargo Tank Vapor Recovery Certification Application Form for your use if needed.

Apply for certification based upon your current expiration date. You may test and apply for certification up to 60 days prior to your expiration date. Please send applications 15 days prior to your expiration date to allow for processing. One form is needed for each cargo tank and the form must be completely filled out or a delay in your certification may result. The form with the application fee shall be sent to the Air Resources Board at the address listed on the application form.

Upon review and approval of the certification application, the Air Resources Board will return a verified copy of the application and decal to the applicant. The verified copy or copy thereof, shall be retained with the cargo tank and the decal may be placed on the right side of the cargo tank.

If you have any questions regarding this Advisory, please contact Robert Fricker at (916) 327-1524 or Bob Leonard at (916) 322-6034. To order additional application forms, please call (916) 322-6950. Please leave the name of the company and mailing address along with how many forms are needed.
