Environmental Contacts for NOVs **Issued to U.S. Navy Installations**

Nancy S. Stehle, Director, Environment, Department of the Navy, has furnished the Air Resources Board with a policy statement and a list of environmental contacts to be used should any U.S. Navy installation be issued a notice of violation (NOV) or notice of noncompliance (NON). Since your District has primary authority for control of air pollution from stationary sources in the District, I am forwarding to you the Navy's policy statement and its list of environmental contacts for various engineering divisions (A map identifying their locations is also included). Of course, this information will only be of use to you should you have a U.S. Navy installation located in your District or subsequently obtain one.

If you have any questions about this advisory, please call me at (800) 952-5588.
