AIR RESOURCES BOARD

Executive Order G-714-ADF-FE01

Alternative Diesel Fuel Regulation
Fleet Exemption for Savage Services – Wilmington, California

Pursuant to Sections 39600, 39601, 43013, 43018, and 43101 of the Health and Safety Code, the California Air Resources Board (CARB) adopted the Regulation on Commercialization of Alternative Diesel Fuels (ADF regulation) published at title 13, California Code of Regulations (CCR), section 2293 et seq. Effective since January 1, 2016, the ADF regulation establishes a comprehensive, multi-stage process administering the commercialization of alternative diesel fuels in California. The ADF regulation governs the introduction and use of innovative alternative diesel fuels in California while preserving or enhancing public health, environmental, and emission benefits of the existing motor vehicle diesel-fuel regulations.

The ADF regulation includes specific provisions designed to control potential increases in oxides of nitrogen (NOx) emissions that could otherwise be caused by the use of biodiesel under certain circumstances. These in-use requirements have been effective since January 1, 2018. The ADF regulation includes exemptions to the in-use requirements for qualifying fleets if owners or operators can demonstrate that they meet the exemption conditions specified in the ADF regulation section 2293.6(a)(5)(A)1, 2, and 3. A fleet exemption may be granted if the followings are met; 1) the fleet owner or operator can demonstrate to the Executive Officer that at least 90 percent of the fleet consists of a combination of light and medium duty vehicles and heavy duty NTDE vehicles and 2) any unmitigated biodiesel approved under this EO will only be used by the exempted fleet.

Savage Services, located at 1634 East Denni Street, Wilmington, CA 90744 has requested a fleet exemption for their fueling station, located at 1635 East Denni Street, Wilmington, CA 90744.

Savage Services submitted their complete fleet composition (Confidential Attachment 1) for their fleet location on March 1, 2018. Their fleet meets the requirement that at least 90 percent of the fleet consists of a combination of light and medium duty vehicles and heavy duty vehicles with NTDEs, as specified pursuant to section 2293.6(a)(5)(A)2.

Savage Services demonstrated that the fleet fueling facility has a centralized and secure fueling area. This facility employs the OPW K800 fuel dispensing system (Attachment 2) that restricts fuel access to authorized users, and sets the fuel type and quantity specified by Savage Services fleet operator(s). All authorized users must have a fuel key to dispense fuel.

Savage Services demonstrated that the fleet fueling facility has procedures or protocols in place to reasonably preclude fueling of vehicles that are not in the exempted fleet. Only the authorized vehicles specified in Confidential Attachment 1 are allowed to access or dispense fuel at this site.

In addition, Savage Services will notify CARB of any changes to the fleet composition.

NOW, THEREFORE, (IT IS ORDERED AND RESOLVED) that the Savage Services located at 1635 East Denni Street, Wilmington, CA 90744 has met all requirements for fleet exemption and is granted an exemption from the in-use requirements in section 2293.6 of the ADF regulation.

CARB reserves the right in the future to review this Executive Order Fleet Exemption to confirm that the exemption continues to meet the requirements, conditions, standards and procedures of Title 13, California Code of Regulation, section 2293, et seq.

Violation of any of the above conditions shall be grounds for revocation of this Executive Order.

Executed at Sacramento, California, this 5th day of June, 2018.

Elizabeth Scheehle
Chief, Oil and Gas and GHG Mitigation Branch
