

Air Resources Board

Workshop on Regulatory and Non-Regulatory Fuels-Related Activities for 2007

**Friday, January 26, 2007
9:00 A.M. – 12:30 P.M.
Byron Sher Auditorium**

**California Environmental Protection Agency
Headquarters Building
1001 "I" Street
Sacramento, California 95814**

**To Participate by Teleconference, Dial (866) 747-3140 and Give the
Participant Code: 2264298 and Leader Name: Dean Simeroth**

Updated Agenda

1. Introductions
2. Discussion of proposed amendments to the CaRFG Regulations
 - Update to California Predictive Model – Staff is proposing to change how the permeation calculations are incorporated into the CaRFG Predictive Model and a change in the model for carbon monoxide.
 - Draft proposed provisions to allow producers to offset excess emissions associated with an inadvertent exceedance of the predictive model formulation flat limit for sulfur – Staff will discuss a proposal to allow producers to offset the excess emissions associated with a batch of gasoline where the sulfur level exceeds the specification established from the use of the predictive model.
 - Draft proposed provisions to allow for the use of alternative emissions reduction plans to offset excess emissions associated with permeation – Staff is proposing to allow refiner/producer the option of seeking emission reductions from other sources while they are making the refinery modifications necessary to produce fully complying California gasoline.
 - Other items
3. Presentations by Others
4. Open Discussion
5. Closing Remarks
