Delta, BC V4G 1A6

Attention: Dan Treleaven, President

**Re: Permitting Requirements under Greater Vancouver Regional District Air Quality Management Bylaw No. 1082, 2008 (the Bylaw)**

Dear Mr. Treleaven:

Thank-you for your email request (received November 05, 2014) and site visit (conducted 11 December 2014) with respect to permitting requirements and the discharge of air contaminants from Consolidated Biofuels Ltd. and Consolidated Coatings Corp. facilities co-located at 310 - 7651 Vantage Way, Delta, BC.

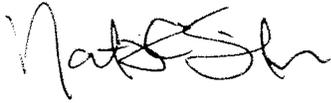

Based on the information provided and the best available emission estimation information from the U.S. Environmental Protection Agency, the quantities of emissions from the facility are expected to be minimal. Therefore, a Permit under the Bylaw (copy enclosed) will not be required at this time. Should there be a change in the production process that impacts the quantity or quality of emissions from your facility or should complaints regarding your facility are received in the future, a Permit and/or further control works may be required. Please notify our office well in advance of any planned modifications of this nature.

In addition, please be advised that the two natural gas fired boilers are authorised and regulated under Greater Vancouver Regional District Air Quality Management Bylaw No. 1087, 2008 (as amended) (copy enclosed).

Please be advised that this letter does not in any way modify or waive the requirements of the Bylaw and does not limit the enforcement actions or remedies available to Metro Vancouver, the District Director or Officers, pursuant to applicable enactments.

If you have any questions, please contact me by phone at 604-436-6783 or by email at [Natasha.Silva@metrovancover.org](mailto:Natasha.Silva@metrovancover.org).

Yours truly,

A handwritten signature in black ink, appearing to read 'Natasha Silva', written in a cursive style.

Natasha Silva  
Officer  
Environmental Regulation and Enforcement Division
