Edmund G. Brown Jr.
Governor

April 5, 2017

Dear Sir or Madam:

The California Air Resources Board staff invites you to participate in an ongoing series of public working meetings to discuss: (1) changes to the pathway carbon intensity application and evaluation process, (2) improvements to reporting and credit generation processes, and (3) the integration of third-party verification requirements under the Low Carbon Fuel Standard. The next two meetings will be held at the California Environmental Protection Agency Headquarters Building as follows:

Monday, April 17, 2017, 9:00 A.M. – 12:00 P.M.

- Fossil and Renewable Natural Gas, Including Biomethane From Dairy and Livestock Operations

Monday, May 15, 2017, 9:00 A.M. – 12:00 P.M.

- Biodiesel and Renewable Diesel

Today's notice is intended to confirm the dates, provide the times and location, and supply instructions on how to participate (in-person, over the phone, or webcast).

Discussion papers and other materials for review will be posted at http://www.arb.ca.gov/fuels/lcfs/lcfs_meetings/lcfs_meetings.htm.

Additional meetings to address other fuel types will be scheduled at a later date. The meetings above will be broadcast as a webcast. For more information on meeting times and locations, please refer to the attachment.

If you choose to participate via webcast, you will be able to listen and view the presentations. Since you will not be able to participate using a microphone, you must use the call-in information provided in the meeting notice if you wish to make a comment or ask a question. You may also provide your questions to us via email if participating via webcast.

The energy challenge facing California is real. Every Californian needs to take immediate action to reduce energy consumption. For a list of simple ways you can reduce demand and cut your energy costs, see our website: <http://www.arb.ca.gov>.
