Subject: Scheduled new build for LRT - Dec. 23

LCFS RT WG members,

The LCFS RT will be updated with a new build on Thursday, Dec. 23. Version 2.1 of the system will contain the following changes:

- Removal of the unique email requirements for users in the system. Organizations that report on behalf of regulated parties will be able to register using a single email address under multiple organizations' accounts. The username, however, will continue to remain unique.
- Addition of fields to the Annual Report to include credit activity summary such as total credits purchased, sold, retired, and transferred (total credits generated will be provided through the quarterly reports). A credit activity summary is required under the LCFS Regulation, Table 3.

** Please note that the credit summary fields will not be visible until after Dec. 31.** You can view the upcoming Annual Report screens in the attached document.

- There will be no changes to the XSD.

While the build is scheduled for the 23rd, users will be able to test the changes in the UAT (Test system) starting Dec. 17.

The LCFS RT UAT can be accessed at <https://ssl.arb.ca.gov/lcfsrtuat/>.

If you have any questions, please do not hesitate to contact me.

Merry Christmas everyone!
