

***LCFS Sustainability Workgroup
Meeting***

Principles

June 16, 2010

1

Purpose

- Intention is to develop a general set of sustainability principles to guide our efforts
- The principles were pulled from various existing certification organizations and government programs
- This set can be applied to all feedstocks – forests, agriculture, or MSW
- These principles need to address environmental, social, and economic issues

2

Discussion

- **Go over the principles matrix together**
- **Discuss what's in the matrix**
- **Discuss what's not in the matrix**
- **Reach consensus if possible**

3

Principles Discussion

1. **Legality**
2. **Planning, monitoring, and continuous improvement**
3. **GHG emissions**

4

Principles Discussion

- 4. Conservation - biodiversity, ecosystems, high conservation value areas**
- 5. Soil**
- 6. Water**
- 7. Air**

5

Principles Discussion

- 8. Use of technology, inputs and management of waste**
- 9. Human and labor rights**
- 10. Rural and social development**

6

Principles Discussion

11. Local food security

12. Land rights
