

D.V. O'Connor, P. Eng.

Mr. O'Connor is President of (S&T)² Consultants Inc. He is a mechanical engineer with a broad background in energy and environmental consulting and in industry. Mr. O'Connor's background includes over 15 years of manufacturing and marketing experience with Western Canada's largest independent fuel retailer. He has successfully developed and commercialized environmentally sound transportation energy alternatives. Other aspects of Mr. O'Connor's background include:

- Developer of Natural Resources Canada's GHGenius lifecycle greenhouse gas model.
- Extensive experience with production of biofuels.
- Detailed knowledge of fuels and the fuels industry.

Education

- Bachelor of Applied Science, Mechanical Engineering, University of British Columbia (1973)

Professional Memberships

- Association of Professional Engineers and Geoscientists of British Columbia
- Society of Automotive Engineers

Mr. O'Connor provides strategic advice on fuels and transportation issues to a number of Provincial governments, several Canadian Federal Government departments and foreign governments. Mr. O'Connor also consults for a number of companies developing new technologies for alternative fuelled vehicles, companies developing new transportation fuel processes, and companies providing traditional transportation fuels.

Current open contracts;

1. Natural Resources Canada. Development of GHGenius.
2. Task 39 IEA Bioenergy. Evaluation of the impact of time on biodiesel lifecycle GHG emissions and a comparison of major model results.
3. National Biodiesel Board. Provide technical analysis on life cycle assessment.
