---

Good Afternoon,

Can I please get a list of attendees from the April 17<sup>th</sup> LCFS workshop on Fossil and Renewable Natural Gas?

Also, from Slide 15 of the presentation and Page 7 of the *Renewable Natural Gas from Dairy and Livestock Manure Staff Discussion Paper* regarding qualified RNG projects, it is not clear whether RNG being trucked to an offsite CNG/LNG fueling station would be eligible. I would recommend the addition or rewording to include this option as eligible. There was an RNG project that proposed this delivery method under the last ARFVTP biofuels solicitation (GFO-15-606).

Thank you,

**Matthew D. Ong**
