Subject: Re: LCFS Workshop on biodiesel comment
Date: Monday, May 15, 2017 6:07:04 PM

Sir/Madam:

As a producer of biodiesel for the California market, Bioenergy Development Group LLC, dba Agrileum, would like to provide feedback regarding point 4 on slide 12 in the May 15, 2017 Public Working Meeting presentation. Our plant, which is currently being upgraded, will produce distillate bottoms as a co-product at a rate of approximately 3%-5% of total production volume. We will be selling the distillate bottoms to third-parties and will be able to provide sales invoices to demonstrate volume for CI calculation and verification. We support the use of sales invoices for documentation of co-product quantification.

Sincerely,

Agrileum/Bioenergy Development Group
