

December 14, 2016

Sam Wade
Branch Chief-Transportation Fuels
California Air Resources Board
P.O. Box 2815
Sacramento, CA 95812

Dear Sam:

H2 Renewables (www.h2renewablesllc.com) participated in the CARB's webinar on December 5 regarding Renewable Hydrogen. We understand that the Air Resources Board is seeking producers of renewable hydrogen to serve the California transportation and refinery fuels markets.

The purpose of this letter is let you know that H2 Renewables is prepared to deliver several hundred tons of hydrogen produced by the electrolysis process utilizing 90+% renewable power. We recommend the Air Resources Board create a feed-in tariff to purchase hydrogen which would encourage multiple producers to enter the market.

We would welcome meeting with you at your earliest convenience to have a conversation about this and other ideas about how to increase the number of hydrogen producers serving the California market. Please contact me at 203-970-9752 or rpchew1@aol.com to further this discussion.

Very truly yours,

A handwritten signature in blue ink, appearing to read 'Robert Chew'.
