

CALIFORNIA SUSTAINABLE FREIGHT ACTION PLAN – SAVE THE DATE

Staff from the California Department of Transportation, the California Air Resources Board, the California Energy Commission, and the Governor’s Office of Business and Economic Development invite you to participate in a workshop and separate webinar on the development of the California Sustainable Freight Action Plan (Action Plan). During the workshop and separate webinar, interagency staff will provide an overview of the process for preparing the Action Plan and its envisioned content, as well as seek public input on what measures, incentives, and partnerships are needed to develop a sustainable freight transport system in California. Each workshop and webinar will follow the same format and show the same presentation. Staff will give a presentation at the Main location, which will be broadcasted to satellite locations. Staff will be available at a satellite location to assist with questions. Specific locations and workshop materials, including an agenda, will be forthcoming.

The workshops will be held on the following dates in the following general locations; the specific locations will be announced in a forthcoming workshop/webinar notice:

Tuesday, January 26, 2016 4 pm-6 pm

BACKGROUND:

In July 2015, Governor Brown issued Executive Order B-32-15, directing the Secretaries of Transportation, Environmental Protection, and Natural Resources to lead other relevant State departments in the development of an integrated action plan, the Action Plan.

The Action Plan will include specific recommendations, actions, investments, and milestones agencies can consider developing and build a sustainable freight transportation system that will demonstrate California's private and public leadership in advancing statewide and national freight priorities, objectives, and goals, and accomplishing statewide goals, such as the targets identified in the Executive Order.

The State will establish clear targets for improving freight efficiency and transitioning to zero-emission technologies in the freight transport system, while continuing to support California's economy. The Action Plan will identify State policies, programs, and investments that can achieve those targets.

The State will also initiate work on identifying corridor-level freight pilot projects within the State's primary trade corridors that achieve the targets set by the Executive Order by integrating advanced technologies, alternative fuels, freight and fuel infrastructure, and local economic development opportunities.

For more information on the California Sustainable Freight Action Plan, pilot project ideas, upcoming workshops and more, please see the [fact sheet](#), or visit ARB's [Sustainable Freight Transport Initiative](#) webpage or Caltrans' [Sustainable Freight Action Plan](#) webpage.
