Affiliation:

Subject: industrial equipment

Comment:

I think the state is trying to go to far, small companies can not afford to change update or modify their equipment for emissions . I think you should stay out these small use areas and concentrate your efforts on the high volume fuel users and maintain sufficientstaff to do so , lay off remaining staff and save the tax payers the money.

Subject: Adding CO2 Levels To Emission Requirements
Comment:

Carbon dioxide (CO2) is a major cause of global warming. Fuel cell vehicles that use reformulated gasoline produce large amounts of CO2. Fuel cells are likely to be used in future models of forklifts and other industrial equipment. I urge CARB to include restrictions on CO2 emissions in this rulemaking, and to implement CO2 restrictions on passenger vehicles and trucks.

First Name: Harada
Last Name: Hidemi
Email Address: hi-harada@mail.nissan.co.jp
Affiliation:

Subject: SAE J2260 Category-1 Specification
Comment:

Dear Sir :

Nissan would like to point out one issue regarding the permeation specification for evaporative emission regulation. Nissan believes CARB thinks to enforce the same evaporative regulation as that of the U.S. EPA. If so, CARB should describe such as SAE J2260(1996). The SAE J2260 has been revised in 2004 year and the permeation specification was changed as below.

1996 version Category-1 spec. HC : 0 ·` 25 g/m2/day

2004 version Category-1 spec. HC : 3 ·` 10

The U.S. EPA's current regulation uses the 1996 year version value.

So, we recommend CARB to clarify the permeation specification like SAE J2260(1996).

Best Regards,
H. Harada

Subject: LSI Impact on Caltrans Fleet
Comment:

To comply with the upcoming Large Spark Ignited (LSI) Rule as proposed for forklifts, the estimated capital cost will be a minimum \$3 million.

There will also be numerous operational costs; e.g. PY's, Specifications, Purchasing. Additional operating costs will also be incurred due to the additional record keeping needed to meet the requirements of section 2775.2.

Addition costs will come from installation labor and maintenance of all retrofits on existing equipment.
